

Organic Clove Bud Essential Oil (15ml)
Stock #: 3843 Regular Price: 26.95

Fortify your emotions with the spicy, rich aroma of Clove Bud Essential Oil.

Clove is a trusted source for those seeking emotional support.

Relieve and Fortify

Clove's spicy and rich aroma is instantly recognizable and is a trusted source for emotional relief.

Clove oil can help energize the mind and open the airways.

It can also freshen indoor air and combat cooking smells. Simply add a drop of clove oil to your home's air filter.

Clove oil has traditionally been used for topical, temporary relief of toothache and to support healthy teeth and gums.

It is also effective for other minor aches and pain when applied topically.

Plus, clove oil makes an effective, natural mosquito repellent. A study to discover non-toxic mosquito repellents found that the undiluted essential oils of clove, as well as lemongrass and patchouli, were the most effective of 38 oils tested and provided 2 hours of "complete repellency".

Our Clove Bud oil is organically grown.

Benefits:

- Diffuse during the changing seasons
- Helpful for minor aches & pains
- Dilute & use topically for healthy teeth & gums
- Mix with Carrier Oil or Hand & Body Lotion for an effective insect repellent
- Organically grown

Ingredients:

100% pure organically-grown *Eugenia caryophyllata* bud oil. Product of Madagascar. Steam distilled.

Quality Assured:

NSP scours the globe to find the highest quality plant sources. Hence, our oils often come from small, family-owned farms in developing regions as remote as Tunisia or Madagascar. While these farms follow organic cultivation practices, they simply cannot meet the high costs of Organic certification. We list oils that come from these farms as ‘organically grown’.

Botanical supply experts inspect sites to ensure that organic practices are in place and, as with all of our oils, third party and in-house GC/MS testing verifies the materials are pure and free of contaminants like chemical pesticides, herbicides, fertilizers or other adulterants.

Recommended Use:

Essential oils may be used aromatically or topically in a variety of ways including diffusers, massage, compresses, baths, scrubs, lotions and sprays.

Essential oils should be diluted with Nature’s Sunshine Massage Oil or Carrier Oil before applying topically.

Complementary Products: Flower Essences, Nature’s Fresh Enzyme Spray, Aroma Ball Plug-in Diffuser, Carrier Oil, Massage Oil
