

Children's MultiVitamin & Mineral (90 vegan gummies)  
Stock #: 23589

Big Nutrition for Little Bodies! Fun, flavorful, nutrient-rich gummies to fuel your little heroes.

Featuring potent vitamins & minerals, balanced just right for little bodies. The kids will crave more, developing healthy habits as they grow.

### **Nutritious Meets Delicious!**

New and improved Children's MultiVitamin & Mineral gummies have just what kids need for healthy growth and development—Essential vitamins and minerals with all-natural flavors and colors.

Our nutritional powerhouse gummies help fill the dietary gaps for kids who don't get enough broccoli, spinach, oranges, and other nutritious foods.

Natural Strawberry-Mango and Passionfruit-Orange flavors ensure that growing bodies get the goodness they need every day.

Kids love 'em!

And Mom and Dad, they're good for you also — So go ahead...you know you want to.

The kids may be skipping veggies, but picky parents come to the rescue with these tasty new treats from Nature's Sunshine.

All-natural, with no artificial flavors, colors or sweeteners, these vegan-friendly gummies digest easily in little tummies, filling the nutritional gaps.

Vitamins and minerals are the basic building blocks of health. And as many of them are essential— meaning they have to come from your diet— supplementation is a great way to ensure growing bodies get the vital nutrition they need.

**Vitamin A** supports healthy vision and provides antioxidant protection and immune system support. Vitamin A also plays an important role in bone formation, skin health, wound healing, growth and reproduction, and the building of healthy blood cells. In other words, it is pretty important.

**Vitamin C** boosts immune function and may help the body fight off colds and flu. The adrenal glands need large amounts of vitamin C to help produce energy and support immunity. Vitamin C is also a powerful antioxidant that supports overall health and well-being by protecting cells from free radical damage. Plus vitamin C promotes strong bones, resilient cartilage and healthy skin, and it helps the body absorb iron and folate.

**Vitamin D** assists the body in absorbing calcium and is important for building and maintaining healthy bones. Vitamin D also plays an important role in regulating healthy immune defenses, and it supports healthy nervous system and kidney function.

**Vitamin B6** helps the body metabolize fats and proteins and gives us healthier hair, skin, liver and eyes. B6 is essential for growth and maintenance, including brain and nervous system function, cardiovascular health, hormone production, immune system function, and energy metabolism.

**Vitamin B12** helps make red blood cells which carry oxygen through the body. It also helps iron function in the body. Plus, vitamin B12 is important for healthy nerve cells and central nervous system function.

**Folate**, a B-vitamin, is great for protecting against cell damage and free-radicals and it supports immune function. Plus, folate works synergistically with vitamins B6 and B12 to metabolize homocysteine, an amino acid that can damage blood vessel linings. Folate is also necessary for healthy brain and liver function, production of red blood cells, and mental and emotional health.

**Pantothenic acid** helps turn the food you eat into the energy you need. It also helps make certain hormones and neurotransmitters to support healthy functioning of the nervous system. And, pantothenic acid supports healthy adrenal glands that help control the body's reactions to emotional and physical stress.

**Iodine** is needed for a healthy thyroid gland and proper thyroid hormone function. It also helps regulate body temperature and supports healthy muscle and nerve function. Plus, iodine supports the growth and maintenance of healthy hair, skin and nails.

**Zinc** is key to hundreds of important functions, including sugar and protein metabolism, DNA formation, and energy production. It's needed for healthy growth and development of bones, and it helps strengthen your immune system.

Zinc also contributes to a healthy antioxidant defense system.

**Benefits:**

- Provides essential nutrition for healthy development & growth
- Promotes healthy immune function
- Supports healthy bones Encourages a healthy brain & nervous system
- Only non-GMO, vegan-certified, gluten-free, dairy-free, soy-free & gelatin-free ingredients
