

High Potency Grapine (60 tablets)
Stock #: 1699

Product Options Grapine with Protectors, SynerPro Grapine, High Potency

A powerful blend of antioxidants derived from natural grape seeds and pine bark ("grapepine") helps you feel confident and good.

Extracts of grape seed and pine bark contain powerful antioxidants that support the nervous and cardiovascular systems.

Antioxidants are the body's natural defense against free radicals, which are cell-damaging chemicals that can accumulate in the body as a byproduct of energy production or exposure to pollution, tobacco smoke, ultraviolet light and radiation.

Antioxidants benefit virtually every organ and body system as they scavenge or "mop up" free radicals before they have a chance to harm cells.

High Potency Grapine® provides a combination of grape seed and pine bark extracts, standardized for high polyphenol content.

Polyphenols, like those found in High Potency Grapine®, are among the most powerful antioxidants found in nature. Polyphenols are known to scavenge free radicals in the body, reducing oxidative stress and supporting endothelial function to maintain smooth blood flow throughout the body.*

Studies have shown that the proanthocyanidins in High Potency Grapine® are much more powerful antioxidants than other popular choices.

High Potency Grapine® offers 60 mg proanthocyanidins per tablet.

Proanthocyanidins are a class of polyphenols found in many plants, such as blueberry, cranberry and grape seeds. Proanthocyanidins support the circulatory system and also help protect vital nerve tissue from oxidative damage. Proanthocyanidins are highly active antioxidant compounds that can readily neutralize brain-damaging free radicals caused by toxins or over-stimulated brain metabolism.

Grape seed extract contains an array of bioflavonoids, antioxidants and polyphenols. It is particularly rich in proanthocyanidins. Studies suggest that grape seed extract may be beneficial for maintaining blood pressure levels and may contribute to overall cardiovascular health.

Pine bark has been used as a food and medicine for thousands of years, even back to the time of Hippocrates, the “Father of Medicine”, in 400 BC. Fast forward to the 1940s, when scientist Jacques Masquelier began studying the health benefits of pine bark after learning that indigenous peoples of North America used pine bark tea to heal scurvy and wounds. Pine bark extract has been used in France since 1950 to promote cardiovascular health, primarily on the basis of its antioxidant effects.

Benefits:

- May help strengthen capillaries.
- Supports the cardiovascular system.
- Scavenges cell-damaging free radicals.
- Reduces oxidative stress & supports circulation
- Helps support the nervous system.
- Provides 60 mg proanthocyanidins per tablet.

Ingredients:

Proprietary blend of Grape seed extract and Maritime Pine bark extract (standardized to 60 mg polyphenols per tablet).

Quality Assured:

Nature’s Sunshine Quality Assurance staff sources the world's purest ingredients, no matter where they are grown, to ensure the active nutrients are delivered just as nature intended.

Recommended Use:

Take 2 tablets with a meal once or twice daily.
