

Protease Plus (90 capsules)
Stock #: 1841

Product Options

Protease Plus (90 capsules)

Protease, High Potency (60 capsules)

Helpful digestive enzymes break down proteins for improved digestion.

Powered by plant-derived trace minerals!

Protease Plus contains the protein-digesting enzyme, protease, which enhances protein digestion and increases nutrient absorption, supporting the immune, digestive and circulatory systems.

Enzymes are essential for digestion and normal metabolic function. Enzymes that break down proteins are especially critical to good health because undigested and foreign proteins can impact your overall health.

Proteases are a type of digestive enzyme that break down proteins into smaller proteins and amino acids. Some proteases act in the stomach, and others are secreted by the pancreas into the intestinal tract.

When taken with meals, Protease Plus acts to help digest proteins from the diet. This formula is ideal for those on a high protein diet.

Protease Plus is formulated to enhance digestion of proteins at various pH levels throughout the digestive tract, ranging from 3.0 to 6.0.

Taken between meals, Protease Plus may help digest foreign proteins in the blood and support immunity by activating macrophages and natural killer cells.

Protease Plus delivers 60,000 HUT protease per serving, plus a full spectrum of

plant-derived trace minerals and beet root fiber.

Beets have traditionally been used to support the liver and promote glandular health. Beets are a good source of dietary fiber which promotes the growth of healthy intestinal bacteria. Beneficial bacteria can aid digestion and support immune function. Fiber also enhances digestion and reduces the risk of constipation.

Trace minerals are crucial for important enzyme functions involved in energy metabolism, oxygen transport, antioxidant protection, hormone production, and neurological functions, just to name a few. Trace minerals are ideally obtained from food, but trace minerals are only present in food if the soil is not depleted, which is an increasing problem with modern farming practices. Food processing further depletes these nutrients which can lead to less than optimal levels of in the body.

Benefits:

- Supports the digestive & immune systems.
- Activates macrophages & natural killer cells.
- Digests protein compounds.
- Provides plant-derived trace minerals to activate enzymes.

Ingredients:

Proprietary blend of Protease (60,000 HUT), Beet root fiber and Trace mineral blend.

Quality Assured:

Nature's Sunshine meticulously tests raw ingredients for microbes, pesticides, heavy metals and allergens, because good-for-you ingredients yield a better blend to help you feel the power of nature

Recommended Use:

Take 1-3 capsules with or between meals, once or twice daily.
